English

My favourite weapon pack so far.

- The Lebensauger .308 is a great sniper rifle, as a matter of fact, it renders the Rattlesnake obsolete. The Lebensauger deals more damage, has a higher rate of fire and stability, and you can even get it more concealed than the Rattlesnake.
- The Kross Vertex is a good smg, tough not my favourite. With a 1200 rpm fire rate, it is better treated like a rifle, going for small bursts aimed for the head, while when i use a smg i prefer a pray-and-spray model. However, it still has a quick reload and a large ammo pool of 120 rounds (which will disappear in no time if you spray the Kross Vertex)
- The pistol crossbow is more of a toy for me than an actual weapon. A cool novelty for stealth, but i still prefer a suppressed Judge, so I can knock back guards into comfortable spots, or even a good old fashioned pistol with a suppressor, simply because I have a chance to take on alerted Murky guards, while with the crossbow you have only one shot, that may not kill. Not a problem when you are in point blank range, but a bigger one when at a larger distance. Moreover, you can get the pistol crossbow only to 28 concealment, with a base of 26.

Additionally, the bolts from the crossbow fall down much quicker than from the Plansrider bow. Makes it even harder to use in combat.

- The shurikens are actually quite usefull outside stealth, tough on DW i would prefer a molotov or nades. The shurikens are poisoned, an the poison works quite well on specials (except for the bulldoser, for obvious reasons), making them vomit much faster than form poisoned arrows or bolts. I managed to stop a charging cloaker with it once. If it's not enough, you can pick your shurikens up after you throw them. Usefull as hell.

Once again: This is my favourite weapon pack so far.. its not good. Edit: Certain people seem clueless to the fact that a game needs to have good single player if it doesn't have online multiplayer. This game's single player is horrible and is not worth the price of the game at all. I wasn't looking for a game to play with friends. I was looking into a game that plays well single player. And the fact they need you to sign in to your steam account to prove you have the game to play with other people... That's beyond stupid. This game is bad unless you live in a condensed neighborhood where all your friends live within 4 miles of you. Then you might MIGHT get some enjoyment out of this game. Go get better versions of this game. This is a common genre on Steam and I suggest you look into better ones.

Without online multiplayer this game has you rely on hooking up gamepads and playing with local friends. Not to mention it forces you to create\sync up a steam account. Which can be good but without an online mode this seems rather pointless other than character looks. Main issues is that it's not very user friendly and what if you don't have any local friends? Well you have the AI but that does get boring quick. I'd not recommend it until some sort of online feature is implemented.. No. Just NO. Too many problems with this, the first being the ridiculous audio settings.. The first problem is the audio. Unless you turn the music all the way down to 0%, the music is way too loud compared to the voice volume, even if you max out the voice. Ugh.

Watch my "Let's Play" and Review of this game right here: https://www.youtube.com/watch?v=SJK4sxPmpo8

The second problem is the voice acting is terrible. When you hear a totally fake cry, it just comes off really cheesy.

But my main problem with this game is the super simple, forced plot that doesn't make you feel anything or care about the character(s) in the story. It's a rushed, super cheesy plot and just feels "wrong" and "rushed" in every way.

The game was left running accidently while I was afk after I completed the whole game, and one play through the game will likely take you somewhere between 30 and 45 minutes. It's not a long virtual novel at all.

There's no excuse for a visual novel like this that they ask any amount of money for feeling so shallow and "rushed". To compare, the visual novel "The Sad Story of Emmeline Burns" is FREE right here on Steam, and is about ten times better then this game.

1 out of 10. Not Recommended.. Decent little minigame collection, even if the actual dexterity-levels are horribly janky..

Gameplay was okay and I thought the artstyle was fitting. However, it's not worth \$15. Way too short of a game and I'm not sur
why there's only 3-player Co-Op when there are 4 playable characters. Music was extremely grating, too.

I like the concept, but the events need some massive balancing. I've talked to the developers and they say the following problem will be fixed. Based on them being so involved I'm going to give this a recommendation for now. As an example of my latest world, everything was going great, really really great, and then I had to pick a card that would give me a large population increase and I knew my game was \u2665

However, the writing is solid and compelling, the character designs are fantastic, and I would die for Eva. If you're like me, and you're in it for the story rather than the art, then As We Know It is absolutely worth the price! Only nine holes at the moment which take about 20 minutes to beat. Solid control system and worth the \$3.

I look forward to more holes and a custom map editor that the developer has mentioned is on their to-do list.. awesome , now i can play game rust. fixed my fps , recommend $100\% \mid 10 \lor 10$
